

Erwann François

SENIOR FRONTEND ENGINEER

MAIL@ERWANN.CO

Senior Frontend Engineer building web products since 2016 in geospatial SaaS, aerospace and consulting. I work where design meets code: I design interfaces or pick them up in Figma, take them to production, then keep them consistent and reusable as the product grows.

EXPERIENCE

Senior Frontend Engineer, Hexagon Infrastructure & Geospatial

AUG 2024 – PRESENT · FULL-TIME · LEUVEN, BELGIUM

GeoCloud: Hexagon's cloud platform for survey and 3D data

- Ship features in React, TypeScript and GraphQL, from design to production
- Act as the bridge between design and development: guide developers on UI details, help designers make UI/UX decisions and communicate them clearly, and step into Figma when the design team needs extra hands
- Run frontend project management for a team of 10: capacity planning and backlog, feature estimates and delivery, release coordination with other teams
- Keep the UI consistent and reusable across the platform, turning design gaps and improvements into backlog items
- Build features on custom 3D libraries, where precise measurements and 3D data are critical

REACT · TYPESCRIPT · GRAPHQL · UX & UI · FIGMA · PROJECT MANAGEMENT

Full-stack Engineer & Designer, Independent

MAR 2018 – AUG 2024 · PROJECT-BASED · FRANCE

Software, web and brand design for clients, plus coaching

- Delivered projects end to end: specs, Figma prototypes, build and release with Next.js, NestJS, PostgreSQL and TypeScript
- Designed websites and brand identities that gave clients a stronger, more consistent presence online
- Designed custom typefaces for display use
- Coached and mentored people going freelance in their own field

REACT · NODE.JS · TYPESCRIPT · POSTGRESQL · FIGMA · ADOBE

Intermediate Full-stack Engineer, Amaris Consulting

JUN 2020 – SEP 2021 · FULL-TIME · REMOTE

Internal platform that improves the consultant experience across the company

- Designed and built, with internal stakeholders, the web app used by 1,000+ consultants, cutting costs significantly for the company
- Stepped up as the main Engineer: main point of contact for the project, in charge of progress tracking and feature decisions, and trained the team in Vue.js
- Acted as Scrum Master, running the team's agile rituals
- Ran technical interviews for new hires, and coached a fellow consultant starting a C# WPF mission

PROJECT MANAGEMENT · C# ASP.NET MVC · VUE.JS · MSSQL SERVER · UX & UI

Full-stack Engineer, Safran Electronics & Defense

SEP 2016 – OCT 2019 · MONTLUÇON, FRANCE

Internal softwares for a leader in Aerospace and Defense

- Led most projects end to end and on my own, from the first user interviews to the final stakeholder presentation
- Worked with stakeholders and end users to design and build tools used by 10,000+ people
- Built full-stack web apps that save over 100 hours a year
- Saved €100,000 a year with desktop software compliant with AMS2750, the aerospace heat-treatment standard

C# ASP.NET MVC & MVVM · UX & UI · JAVASCRIPT · MSSQL SERVER · T-SQL
